PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with a strong foundation in Data Structures and Algorithms, full-stack development, and Python programming. Interested in backend development, AI/ML, and building scalable software solutions. Passionate about problem-solving, continuous learning, and applying Python to develop practical, data-driven applications.

WORK EXPERIENCE

Software Developer | Internship — Jun 2025 - Present
Ingenious Techzoid — *On-site · Gurgaon*

- Developed and optimized **object and defect detection systems** using OpenCV and YOLO for industrial machine vision applications.
- Implemented **automated visual inspection solutions** to identify defects and improve inspection efficiency in industrial environments.

Technologies / Skills Used : *Python, OpenCV, YOLO, SQLlite*

PROJECTS

Vyavastha | Website Github

- Developed a full-stack project management platform enabling teams to create projects, assign tasks, set deadlines, and track progress.
- Implemented real-time team chat using Socket.IO, featuring project-specific conversations and persistent message history.
- Designed RESTful APIs and relational database schemas to manage users, projects, tasks, and team communication.
- Implemented JWT-based authentication and role-based access control to secure project resources and team collaboration.
- Built an interactive dashboard to monitor task statuses, project progress, and team activity.

Technologies / Tools Used : *React, Node.js, Express, MongoDB, Tailwind CSS*

QuickAI | Website Github

- Developed and deployed a full-stack AI SaaS platform offering AI article generation, blog title generation, resume review, and AI-powered image tools.
- Built RESTful APIs using Node.js and Express.js to integrate AI services and handle frontend requests.
- Integrated Clerk for user authentication, PostgreSQL for database management, and Cloudinary for image storage.
- Deployed the frontend and backend on Vercel, configuring production environment variables and cross-origin communication (CORS).

Technologies / Tools Used : *React, Express, MongoDB, Tailwind CSS, Node.js*

Bazzar | Website Github

- Developed a full-stack e-commerce platform featuring product listings, category-based filtering, product details, and shopping cart management.
- Built RESTful APIs for product management and user authentication using JWT and bcrypt.
- Implemented product image upload functionality using Multer and designed MongoDB schemas for product and user data.
- Developed cart management and checkout functionality to provide a streamlined online shopping experience.

Technologies / Tools Used : *React, Express, MongoDB, Tailwind CSS*

SKILLS

Programming Languages :	C++, Python, JavaScript
Databases :	MySQL, MongoDB
Frameworks & Libraries :	React, Node.js, Express
Tools & Platforms :	Git, GitHub

EDUCATIONS

BBDNIIT | Lucknow — Sep 2023
